

JOURNAL OF NUTRITIONAL SCIENCE AND VITAMINOLOGY

Vol 70, No 4, August 2024

CONTENTS

Regular Paper

- HARA N, OSAGO H, HIYOSHI M and KOBAYASHI-MIURA M: The Rate of NAD⁺ Break-down Is Maintained Constant against Deletion or Overexpression of NAD⁺-Degrading Enzymes in Mammalian Cells..... 295–304
- UMEGAKI K, OZEKI A and YOKOTANI K: High Bioavailability of Spinach Folate Evaluated by Functional Biomarkers in a Folate Depletion-Repletion Mouse Model... 305–310
- KURAMITSU K, KADOTA Y, WATANABE A, ENDO A, SHIMOMURA Y and KITaura Y: The Effects of 1-Kestose on the Abundance of Inflammation-Related Gene mRNA in Adipose Tissue and the Gut Microbiota Composition in Rats Fed a High-Fat Diet..... 311–317
- ISHIYAMA S, KIMURA M, NAKAGAWA T, KISHIGAMI S and MOCHIZUKI K: Induction of the Lipid Droplet Formation Genes in Steatohepatitis Mice by Embryo/postnatal Nutrient Environment Is Associated with Histone Acetylation around the Genes..... 318–327
- SHIMIZU M, SHIMIZU A, TAKAMASU T, GOTO H and TANIGUCHI H: Effectiveness of Nutrition Support Team Intervention in Pediatric Patients with Cancer..... 328–335
- HANEISHI Y, WATANABE S, OKADA A, TAKEMAE H, BASTONI D, TREPPICIONE L, SAGGESE A, MIZUTANI T, ROSSI M and MIYAMOTO J: The Intake of Dietary Lipids Improves Glucose Tolerance via Modulating Gut Microbiota..... 336–343
- WADA Y, MATSUZAKI TADA A, YOKOYAMA M, TANAKA M and KONDO K: Prevention of Age-Related-Increases in the Risks of Incident Functional Disability and Dementia by Home-Delivered Functional Dairy Product Consumption in Japanese Older Adults..... 344–351

Note

- NIIDA Y, ONISHI H, OHAMA H, TSUBOUCHI H, KOUJIMOTO A, MIZUKAMI Y, OKAMOTO T, IKAWA M, KUBOTA M, TAKEBE M, TAKAKU N, TSUJI K, KAWAHARA C, INOUE T, HASEGAWA D, NAKAMORI Y, HIROBE T and YAMAMURA O: Individualized Nutritional Management Using Dishcook Improves Nutrition Status Markers in Patients with Intellectual Disability 352–358
- IZAWA H, KATO S and TATEHANA H: Suppressive Effect of Apple Juice Intake on Urinary Excretion of Ascorbic Acid: Unblinded Randomized Crossover Study in Healthy Japanese Subjects 359–363
